95-05

Effective Date: October 13, 1995

Subject: Submission of monthly production reports
stating **Ano production@**

Reference: Label Control Program, XVII, F

ISSUE: Under the current label control program procedures, a manufacturer must submit a monthly production report stating **Ano production@** when it does not build any IBC certified units during a given month. Some inspection agencies requested that this requirement be refined to accommodate manufacturers that build only a limited number of IBC certified units.

INTERP: In an effort to eliminate unnecessary paperwork, the Commission has decided that a monthly production report stating **Ano production@** does not have to be submitted if the manufacturer does not have any **Aunused@** IBC certification labels. An **Aunused@** certification label is any label that has been assigned by an inspection agency to a manufacturer and that has not been applied to a building.
